# TECHNOLOGY TO KEEP YOU SAFE

**AN INTELLIGENT SAFETY SYSTEM FOR COMPLETE  
PEACE OF MIND.**

Life can be unpredictable. However, with the Camry Hybrid, you'll always be prepared for the road ahead. Toyota Safety Sense, a full suite of revolutionary driver-assistance technologies designed to support situational awareness, comes as standard to protect you and all your passengers. Road Sign Assist, Automatic High Beam and Lane Trace Assist help you drive safely while the Emergency Steering and Intersection Turn Assistance on the Pre-Collision System gives you extra peace of mind. From monitoring road signs to automatic braking that makes parking easier, the intelligent and adaptive safety tech in the Camry Hybrid is designed for all life's possibilities.

For illustrative purposes only; showing a combination of several safety features. See our website for complete information on safety features.

#### PRE-COLLISION SYSTEM ENHANCED WITH EMERGENCY STEERING ASSIST AND INTERSECTION TURN ASSIST

The advanced Pre-Collision System uses both automatic braking and steering assistance to reduce the likelihood and severity of an impact, and can detect cars, pedestrians (day or night) and cyclists (day only). Two new functions support the driver even further in daytime driving: Intersection Turn Assist provides help when turning at junctions, while Emergency Steering Assist helps the driver to operate prompt steering while keeping vehicle stability when making evasive manoeuvre.

#### ROAD SIGN ASSIST

The system monitors the road signs ahead, displaying current speed limit or overtaking restrictions in clear view on the colour TFT multi information display.

#### LANE TRACE ASSIST

If the car begins to drift from the centre of the lane unintentionally, steering assist is applied to correct its course.

#### INTELLIGENT ADAPTIVE CRUISE CONTROL

This technology includes the features of Adaptive Cruise Control combined with Road Sign Assist, automatically keeping the car at a pre-selected speed and warning the driver if the speed limit changes, and allowing (the driver) to easily adapt the cruising speed accordingly.
