

Pushing the limits for Better

GR SUPRA

GR TOYOTA
Supra

The legend is back. Produced by TOYOTA GAZOO Racing, the development of the new Toyota GR Supra wasn't driven by simple performance numbers or headline lap times, but by a single-minded focus on the feeling you experience at the wheel.

CONDENSED EXTREME DESIGN

Chief Designer, Nobuo Nakamura, gave his team a simple brief for the Toyota GR Supra: the concept of “Condensed Extreme”. Free to express their vision of a pure, individual sports car, they drew on Toyota’s rich heritage to produce a car that’s indisputably modern, yet evokes the romance of classic sports car styling.

The Toyota GR Supra’s “Condensed Extreme” design refers directly to its appearance, evident in its long bonnet, compact body and wide stance. By blending motorsport aerodynamics with a contemporary, powerful look, it screams undiluted driving performance, even at a standstill.

Nobuo Nakamura

CHIEF DESIGNER

“I knew my mission was to create a design that would be visually and physically exciting to sports car fans. By using a front-mounted straight-six engine, rear-wheel drive layout – something rarely seen in today’s cars – I was able to reach something beyond Toyota’s boundaries.”

Tom Matsumoto

FOR THE FEELING

THE SOUL OF TOYOTA SUPRA

A legend among sports car fans, moviegoers and gamers, the Toyota GR Supra has cemented its place in popular automotive culture over the last 40 years. With its long, sweeping bonnet, compact body and double-bubble roof, the new Toyota GR Supra's bloodline can actually be traced back to the 1960s, and the iconic Toyota 2000GT.

The resemblance is more than skin deep though, as a clear thread runs through each generation of the Toyota Supra: a smooth, responsive, in-line straight 6-cylinder front-mounted engine and rear-wheel drive configuration gives the purest driving experience possible.

POWERFUL SENSATION

At home on road or track, the Toyota GR Supra's 2.0-litre, in-line straight 4-cylinder and 3.0-litre, in-line straight 6-cylinder engines deliver seamless power and instant response. Featuring a twin-scroll turbocharger, direct fuel injection and variable valve control.

High performance stopping power

To help drivers exploit its full dynamic potential, the new Toyota GR Supra's high-performance brakes feature 4-pot Brembo callipers on 18" & 19" alloy wheels.

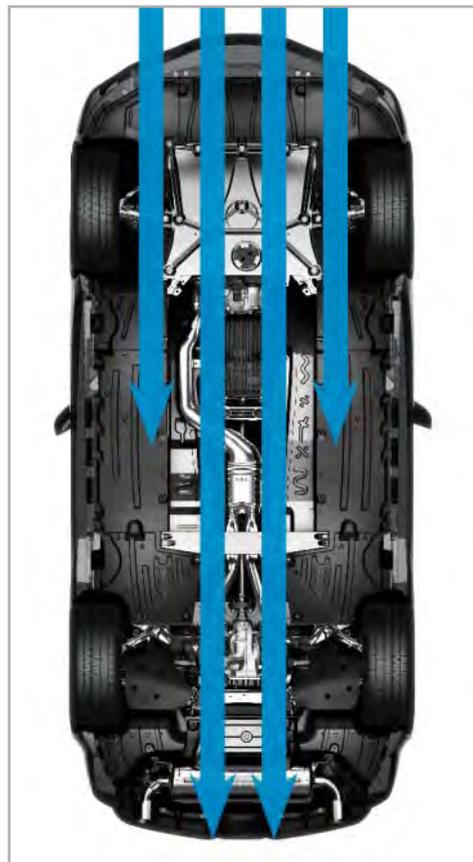

Active sound design

The Toyota GR Supra is equipped with Active Sound Design with two selectable driving sounds. For everyday driving, Normal mode provides refined motoring that's perfect at the end of the day, whilst Sport mode delivers spine-tingling high tones and racing-inspired pops during downshifts.

RACING-INSPIRED AERODYNAMICS

TOYOTA GAZOO Racing has been instrumental in honing the Toyota GR Supra's performance. By drawing on its international motorsport expertise, the Toyota GR Supra's design achieves both optimum aerodynamic drag and lift characteristics, as well as an ideal 50:50 front/rear weight balance.

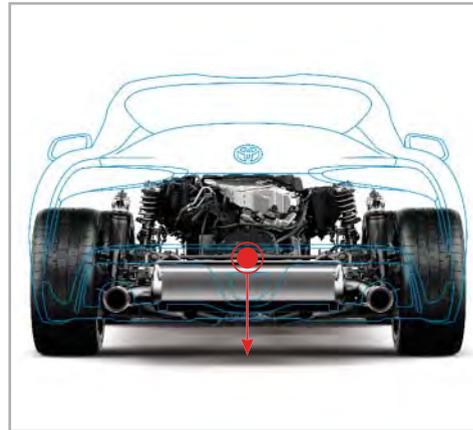

Under the skin, a light but rigid aluminium and steel composite frame ensures the Toyota GR Supra corners with precision. Elsewhere, aluminium control arms and swivel bearings reduce the car's weight, to give you confidence, grip and balance when you need it most.

Underfloor aerodynamics

Aerodynamic performance reaches new levels in the Toyota GR Supra. As well as a double-bubble roof that's designed to reduce drag and an arching rear spoiler that suppresses lift, airflow-regulating fins located underneath the body ensure ground-hugging performance.

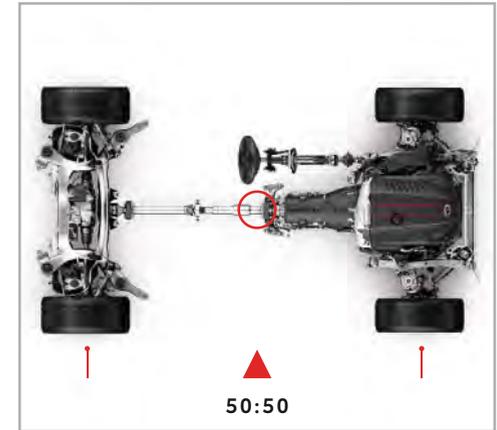

PURE FEELING

The new Toyota GR Supra has been conceived as a sports car in its purest form. It combines a short wheelbase and wide track to achieve the ideal 1.55 “golden ratio” and, as a result, provides exceptional agility and stability.

The golden ratio

The best balance between agility and stability is achieved when a car's wheelbase length and tread width ratio is between 1.5 and 1.6. The Toyota GR Supra achieves the ideal 1.55 “golden ratio”, which, when combined with a low centre of gravity and light weight, provides exceptional control and response at the limit.

All in the balance

Thanks to a short wheelbase and a traditional front-engined, rear-wheel drive layout, the Toyota GR Supra achieves the perfect 50:50 front-to-rear weight distribution, so you can enjoy neutral handling and seemingly limitless grip.

Focus on what matters

3.0 Pro is equipped with a Head Up Display (HUD), complementing the driver's instrument panel. The HUD highlights speed, safety features and navigation information clearly in your eyeline, minimising any potential distractions.

* Standard on 3.0 Pro only.

Modes to suit your mood

Switch between the Toyota GR Supra's two driving modes and feel engine, transmission, damping, steering and differential performance all adjust to suit your preferred driving style. For greater control, engage "Track" to reduce the level of intervention from the Vehicle Stability System.

DRIVER-CENTRIC CABIN

Influenced by the layout of single-seater racing cars, the cabin of the new Toyota GR Supra puts you at the centre of the action. Located around the purposeful, 3-spoke steering wheel, a Head Up Display* and digital combi-meter combine to give you all the information you need, when you need it most.

The Toyota GR Supra's 8.8" central multimedia system provides access to navigation, Toyota Supra Connect, music and voice recognition, so you can concentrate on the art of driving.

TOYOTA SUPRA CONNECT SERVICES

You don't want anything to distract you when you're behind the wheel of the Toyota GR Supra. That's why we've introduced Toyota Supra Connect, a range of connected services that makes your journey seamless.

Through the Toyota Supra Connect app and portal, you can control and activate a variety of functions remotely, including the Concierge Service and Apple CarPlay.

Toyota Supra Connect can be downloaded directly from the Apple App Store to your iPhone, or to your Android phone through the Google Play Store, or accessed via the Toyota Supra connect website <https://www.toyota-supraconnect.uk/>. Simply create an account and get access to a range of connected services such as "Find my car" or "Lock/Unlock my car".

MyT is a service that enables you to conveniently schedule a service, book maintenance or arrange repairs, via your smartphone. All you need to do to activate MyT is download the app, create an account and register your vehicle.

Remote control

The Toyota Supra Connect app on your iPhone or Android phone gives you remote control over your car. If you need to check the fuel level, range and mileage, simply open the app. Should you need to lock and unlock the doors, flash the headlights or change ventilation settings – you can. What's more, it lets you send your next destination to the navigation system from your phone, with one tap.

Connected services

A range of connected services lets you talk to people when you need help – without a phone. The Concierge Service can locate restaurants, book hotels and even update you on the status of your flight. The eCall feature will automatically alert the emergency services in the event of a serious accident. The Breakdown Call feature puts you in touch with a roadside assistant in the event that your vehicle requires technical support.

Smartphone integration

Apple CarPlay* is a safe and responsible way to enjoy the apps and maps available on your iPhone. For your convenience CarPlay transfers the functionality of your iPhone onto the 8.8" touch screen. Toyota GR Supra has the latest wireless CarPlay technology so no need for cables and no worries if you left your phone in your briefcase or handbag.

* Currently, only Apple CarPlay is offered, Android Auto™ is not available.

Apple CarPlay is a trademark of Apple Inc.

TAKE COMFORT IN THE CONTROL

With its asymmetric centre console, racing-inspired seats and premium technology, the new Toyota GR Supra offers the ultimate blend of GT comfort when you want it, and sports car control when you need it. Its power-adjustable leather seats incorporate heating and memory functions*, while adjustable side bolsters provide comfort and support.

For added convenience, the Toyota GR Supra's dual-zone air conditioning includes memory-touch switches for each operation, while the 8.8" central multimedia display can be operated as a touch screen, or by using a rotary controller.

A moment to relax

For moments when you want to settle back and relax, the new Toyota GR Supra is equipped with a 4-speaker audio system including Bluetooth® and USB port connections. The 3.0 Pro comes with a JBL® Premium Sound System, 12-speakers and wireless mobile phone charger.

A supportive seat

The new Toyota GR Supra's racing-inspired, power-adjustable (including lumbar support) seats incorporate integrated heating and memory functions*. (Image shown in black leather, standard on 3.0 Pro.)

* Standard on 3.0 Pro only.

Pre-Collision System with Pedestrian and Cyclist Detection

The system, with Cyclist and Night-time Pedestrian Detection, combines a camera with radar technology to detect cyclists and other vehicles on the road, while also detecting pedestrians in low light. When the possibility of a collision is sensed, audio and visual warnings are triggered. If the driver doesn't react, or the brakes aren't applied with enough pressure, the system will automatically engage to prevent or mitigate a collision.

Lane Departure Alert with Steering Control

Using a camera to detect the lane markings in the road ahead, Toyota Safety Sense's Lane Departure Alert will give the driver audible and visual warnings if the vehicle starts to deviate from its lane without the indicator being applied. Steering Control applies corrective force in the case of unintentional lane departure.

A FORCE IN SAFETY

When a sports car can perform at this level, safety is paramount. That's why the Toyota GR Supra is equipped with Toyota Supra Safety+, a suite of technologies that includes Blind Spot Monitor*, Lane Departure Alert with Steering Control and Adaptive Cruise Control*. A tyre pressure monitoring system (TPMS), temperature alarm and an eCall function that alerts the emergency services in the event of a serious accident add to a sense of all-round confidence, no matter what the situation.

In the city, you are aided by pedestrian and cyclist detection, plus intelligent parking sensors with automatic braking*, to keep you and others out of harm's way.

* Standard on 3.0 Pro only.

ALL ACTIVE SAFETY TECHNOLOGIES are intended to be back-up systems only and are not a substitute for safe and attentive driving. The functionality of these systems may be impacted by driving conditions. Further information is available from your local Toyota Centre.

DESIGNED TO PERFORM

The new 2.0 Pro grade offers 18" alloy wheels, black Alcantara® sports seats and Toyota Supra Safety. An 8.8" display audio system completes your introduction to Supra.

2.0 Pro grade main features

- 18" Black & Silver Bi-tone Machined-face alloy wheels (5-double-spoke)
- Active Sports differential
- Adaptive Variable Suspension (AVS)
- Supra Red Sports Calipers
- Toyota Supra Safety+ incl Pre-Collision System with Pedestrian and Cyclist Detection, Cruise Control, Lane Departure Alert (LDA) with steering control, Adaptive Auto High Beam (AHB) & Road Sign Assist (RSA)
- 8.8" Toyota Touch® 2 with Go navigation system, connected services, voice recognition, 4 speakers, DAB & Bluetooth® connectivity
- Reversing Camera
- Drive mode selector
- Electrically heated Black Alcantara® sports seats with power adjustable lumbar support
- Aluminium Pedals
- Smart Entry & Push-button Start
- LED headlights & LED Daytime running lights
- Power retractable door mirrors
- Dual-zone air conditioning
- eCall emergency call system

PREMIUM FEEL, PURE PERFORMANCE

The Toyota GR Supra combines extraordinary levels of performance with high-end comfort and premium levels of equipment. Toyota GR Supra is always ready to entertain.

3.0 Pro grade main features (additional to 2.0 Pro)

- 19" Black & Silver Forged alloy wheels (5-Double-Spoke)
- Black Leather Sports seats with power sliding & reclining front seats with drivers memory function
- JBL® Premium Sound System with 12 speakers
- Adaptive Cruise Control (ACC) with Full Stop & Start functionality
- Rear Cross Traffic Alert (RCTA)
- LED Dual-beam Projector headlights
- Front & Rear parking sensors
- Wireless mobile phone charger
- Head Up Display (HUD)
- Power-adjustable door mirrors with memory function
- Cornering lights

PERFORMANCE ART

The Toyota GR Supra's "Condensed Extreme" design will turn heads whichever colour you choose. With a choice of six exterior finishes, from the striking Prominence Red to the powerful-looking Ice Grey metallic, your look is sure to impress.

While every effort is made to reproduce accurate information, we reserve the right to change specifications, equipment and availability without prior notice. This brochure cannot be regarded as infallible (some of the vehicles shown may not be to exact UK specification), and as such does not constitute an offer for sale of any particular vehicle or specification. For the latest specification and availability, we ask that you contact your local Toyota Centre. Vehicle body colours may differ slightly from the printed images in this brochure.

Quoted mpg and CO₂: Figures are provided for comparability purposes; only compare fuel consumption and CO₂ figures with other cars tested to the same technical procedures. These figures may not reflect real-life driving results. Fuel consumption and CO₂ produced varies significantly depending on a number of factors, including the accessories fitted (post-registration), driving style, conditions, speed and vehicle load.

All models and grades are certified according to the World Harmonised Light Vehicle Test Procedure (WLTP). All mpg and CO₂ figures quoted are full WLTP figures.

The official CO₂ figures for vehicles changed as from 6 April 2020, due to a change in the official method of calculation. CO₂ figures are used in the calculation of Vehicle Excise Duty (car tax) for new cars during their first year of registration. As a result, all CO₂ figures, car tax and 'on the road' prices for new vehicles, which were provided or displayed prior to 6 April 2020, may now have changed for vehicles which were not registered before that date. These dates may change, please visit www.vehicle-certification-agency.gov.uk/fcb/wltp.asp for the latest information.

Please contact your local Toyota Centre for further information.
