Meet The DFSK EC35

Up to 166 mile electric range

Rapid charge in 1 hour

4.8m³ cargo capacity

1,015 kg payload

5 year /75,000 mile
vehicle warranty

8 year /100,000 mile
battery warranty

The DFSK EC35 is a compact electric panel van designed to keep your business on the move with zero emissions. With up to 166 mile pure electric range and the ability to recharge to 100% in 90 minutes (and up to 80% capacity in 60 minutes), this latest electric vehicle from DFSK is highly capable.

Its neat dimensions are ideal for inner-city driving and manoeuvring, but don't let its size disguise its abilities as the DFSK EC35 can carry a payload of up to 1,015kg. Combined with a cargo capacity of 4.8m³, the DFSK EC35 is fit for a wide range of uses, from transport for your engineers and their equipment to last mile delivery.

The EC35 is seriously practical, with 2 sliding side doors and a rear tailgate, you'll always be able to access your load. The comfortable 2-seat cabin comes equipped with great driver conveniences such as parking sensors, reversing camera, and a 6.8-inch infotainment unit with DAB, AndroidAuto™ and Apple CarPlay®.

With its 5 year/75,000 mile warranty, the DFSK EC35 is the ideal way for your business to switch to electric without any compromises.

Official range figures for the DFSK EC35 under WLTP test conditions are up to 166 miles (top speed 50mph) and up to 101 miles (top speed 62mph). The DFSK is a battery electric vehicle requiring electricity for charging. Range data has been determined according to WLTP test procedure methodology. The figures shown are intended for comparison purposes only and should only be compared with other vehicles tested to the same technical standard. The range achieved under real world driving conditions will depend upon a number of factors, including but not limited to: accessories fitted (pre and post registration), driving style and conditions, vehicle payload, weather, use of heating/air conditioning and battery condition.

Key Features In Focus

The DFSK EC35 is kitted out with a range of features to make life easier, including:

39 kWh battery generating up to 166 miles of driving range on a single charge

AC and DC charging capabilities, increasing public charging opportunities and allowing for a rapid charge to 80% charge in 1 hour or 100% in just 90 minutes

L4,500 x W1,680 x H1,985mm size allowing for nimble manoeuvring and driving in tight spaces

Compact dimensions complimented by 1,015kg payload and capacious 4.8m³ cargo capacity

Sliding door access to the cargo hold on both driver and passenger side, allowing for easy loading and unloading no matter where you're parked

A variety of modern driver conveniences including reversing sensors, Bluetooth™, DAB, air con and infotainment unit with Android Auto™ and Apple CarPlay®

Five door central locking, protecting your cargo wherever you are.

Interior

The well-equipped cabin is fitted with two adjustable seats in grey fabric, with co-ordinating black and silver dash. The instrument panel shows you the available battery charge so you can predict when they'll need to plug in next. The 6.8-inch screen with Android Auto™ and Apple CarPlay® is set in the centre of the dashboard. Your reversing camera video will display on this screen when activated. The DFSK EC35 comes with electric windows as standard and a manual handbrake.

Price And Purchasing

The DFSK EC35 electric van is available to purchase for £20,999+VAT, including Plug-in Van Grant*, a Government fund available for electric vehicles, saving you £5,000. We will apply for this Grant on your behalf, so it will be automatically applied at point of purchase.

To find out more, to book a test drive and to purchase your DFSK EC35, contact the Innovation Automotive sales team at sales@innovationautomotive.co.uk or call **0333 006 4637**.

Warranty, Servicing And Roadside Assistance

Warranty

The DFSK EC35 comes with a 5 year/ 75,000 mile warranty, giving you great peace of mind as you take to the roads in your new electric van. The EV battery benefits from additional cover at 8 years/ 100,000 miles.

Servicing

We offer comprehensive servicing and maintenance through a selected network of Halfords Autocentres. Services are due annually or at 15,000 miles, whichever comes soonest and can be booked online or by phone.

Roadside Assistance

The all new DFSK EC35 comes complete with 3 years roadside assistance, covering your vehicle in the event of a breakdown.

Accessories

We offer a range of optional accessories for fitment to your DFSK EC35.

| | |
|------------------------|--|
| Thatcham EASYCAN alarm | The Thatcham certified EASYCAN Alarm features boot/bonnet/door protection, ultrasonic interior protection, audible/visual arming signals, secure override function, ignition hotwire protection, auto re-arm and diagnostic flashing LED |
| Rubber mats | Durable rubber mats for the driver and passenger footwells that can be easily removed to clean |
| Polypropylene lining | Thick polypropylene lining fitted to the interior of the cargo area offers protection without adding excess weight |
| Ply lining | Ply lining of the cargo area designed to offer enhanced protection |
| Seat covers (standard) | One-piece waterproof seat covers set for driver and passenger seats to protect the vehicle's upholstery |
| Seat covers (premium) | Three-piece, fitted seat covers finished in a premium, durable waterproof fabric to give added protection to the vehicle's upholstery |

The Brands Behind The Van

Founded in 2003 as a joint venture between several top-performing auto companies in Asia, DFSK now have over 3,000,000 users on the road worldwide. For years, they've focused on developing electric vehicle and intelligent auto technology, ready to support the global switch to EVs. The company runs multiple manufacturing facilities in Asia and the USA and is an A-share listed company with over 10,000 employees. Innovation Automotive has been appointed official distributor of DFSK vehicles in the UK. The DFSK EC35 is one of the top-selling vans in China.

INNOVATION AUTOMOTIVE

Innovation Automotive is the UK's first multi-brand electric vehicle provider, designed to make the switch to electric vehicles simple, accessible and sustainable. If you have any questions for our friendly team of experts, please email sales@innovationautomotive.co.uk or call us on **0333 006 4637**.

The Benefits Of Switching Your Business To Electric Vehicles

Lower running costs

There are huge savings to be made in the cost of charging an electric van versus refuelling with petrol or diesel, as well as on Vehicle Excise Duty (VED). A full charge is considerably cheaper than a full tank and, as there are fewer moving parts in an EV, servicing and repairs cost less too.

Avoid emissions charges

Driving an electric vehicle can help you save in many city centres, avoiding congestion and emissions charges. For example, it currently costs £12.50 a day to drive in London's ULEZ area, but this is completely free in a fully electric van.

The Government pays towards your new EV

The Government's Plug-In Van Grant* provides a contribution of £5,000 towards the purchase of your new DFSK EC35. There are tax incentives too, including capital allowances on low-emission vehicles, as well as money towards workplace chargepoint installations.

* The Plug-in Van Grant is a Government issued grant. It is available for this vehicle at time of print but the Grant may be changed or withdrawn at any time.

It's not just about being good to the planet, making the switch to electric vehicles can be very good for your business's bank balance too. Once you're making the savings, you can shout about your new eco-friendly fleet to your customers: 4 out of 5 UK consumers prefer to choose brands with a positive approach towards environmental sustainability¹.

All You Need To Know About Going Electric

Dimensions

The DFSK EC35's dimensions and cargo space lend it to many different applications. The spacious and easily accessible cargo hold is well-suited to last-mile delivery applications. The vertical-lifting rear tailgate is ideal for engineers and tradespeople who regularly work at their van when on site, giving ready access to tools and shelter from the elements while they work.

Charging

The DFSK EC35 comes equipped with a CCS 2 charger and a Type 2 charging cable. It can be charged from both AC and DC charging points which can be found in car parks and service stations around the UK. Wallboxes and other charging infrastructure available from a wide range of suppliers are suitable for use with the DFSK EC35 and can be installed at your home or business premises – there are even grants available for these installations. The DFSK EC35 can rapid charge to 80% in 60 minutes and to 100% in 90 minutes.

Electric Range

Just like a petrol or diesel vehicle, the electric range available to you within an electric van can be managed by a few, simple driving techniques. You'll get the most out of your available charge by maintaining a consistent speed wherever possible and being alert to changing road conditions that will require you to brake or change speed. Heavy payloads and low temperatures can reduce the range available to you even on a full charge but there are a wide range of apps available to help you plan your route and find charging points.

Driving Experience

As an electric vehicle, the DFSK EC35 offers a smooth drive with instant torque. It has an easy to understand automatic gear selector that means any new driver can just get in and go. It makes a low level of noise to warn pedestrians that the vehicle is approaching; this also leads to a quiet and pleasant cabin for the driver.
