

RENAULT MASTER

1st October 2021

Renault Master, a vehicle for everyone

Renault presents Renault Master and reasserts its expertise in the field. Master is instantly distinguished through a more dynamic front-end design featuring the signature C-shaped lighting. An elevated bonnet line, vertical front grille and new 'Urban Grey' colour complete the revised styling. Master is available in three body heights and four body lengths to adapt to the needs of all users.

Driving has never been as comfortable

Professionals have tough and busy days; this is why the Renault Master cabin area has been designed to provide the comfort and practicality of a 'Mobile Office'. Packed with clever solutions, such as hidden laptop storage, that help to keep you connected on the go. (standard on Business+).

Easy and secure loading

Master gives priority to practicality and efficiency. The rear doors can be opened 270° (optional), and the very low body sill makes it easier to load cumbersome items. Anchorage points (up to 12) secure the goods, and handles, ideally placed on the sides of the doors, save you effort in loading and unloading from the rear area. With its wide rear and side openings and optimum load volume (from 8 m³ to 20 m³), Master adapts to the needs of all users.

In terms of security, the reinforced locks, factory fit alarm* (Thatcham approved category 1, volumetric and perimeter) and 3-button key (standard on Business+) ensure that you work with complete peace of mind.

*Alarm not standard on Master E-Tech electric

Our profession, adapting to yours

Master is the tailor-made utility vehicle! A wide-range of body styles are available and include specific versions that meet unique needs: tippers (including the Aluminium Body version) and box vans. These variants are 100% Renault 'off-the-shelf' products produced and delivered as quickly as our standard vehicles.

It is also easy to convert a more bespoke vehicle using either a panel van, chassis (single or double cab) or platform cab with thanks to one of our many Renault approved converters across the UK.

For more details about our range of Off-the-shelf and Tailor Made accredited conversions please see our separate Conversions Range brochure.

1.

Performance and safety

In terms of driving, the increased power and torque offer greater comfort at low engine speed and more responsiveness at higher speed. The Renault Master engines help you save fuel through controlled consumption.

Rear View Assist Camera: The new driving assistance systems do everything to make your life easier. The "Rear View Assist", a Renault innovation, offers excellent rear view at mid and long distance for the best possible anticipation when driving*.

Blind Spot Warning: Master can be fitted with a system that detects the presence of any vehicle in your blind spot. Active between 19 mph and 87 mph, a light signal alerts you immediately in the event of an obstacle and gives you an optimised side view.

Side Wind Assist: Master is fitted with a system that helps maintain its trajectory above 43 mph when it is subjected to strong side winds or when a vehicle is overtaking it.

Automatic Emergency Braking System: An active safety system able to detect moving or stationary vehicles. Automatic emergency braking is triggered and takes charge of braking if you react with a delay.

(1) Rear View Assist Camera (optional)

(2) Blind spot warning (optional)

(3) Side wind assist (standard)

(4) Advanced Emergency Braking System (optional)

* Only when driving forward, does not function when vehicle is reversing.

Front-wheel drive

Rear-wheel drive

Two versions available

Does your business involve the transport of heavy, cumbersome and fragile loads? Master has two technical choices to meet your requirements: a front-wheel drive version and a rear-wheel drive version. Which to choose? Each offers unrivalled road handling and has its own advantages. With a loading sill that is 13 mm lower, Master front-wheel drive* and its 3 different lengths is perfect for payload and road transport. But if you're looking for traction as a priority, choose Master rear-wheel drive, capable of transporting the heaviest loads on the rear axle (in particular with twin wheels) and towing a trailer up to 3.5 t**, on all types of terrain. After all, what better than to have a choice?

* GVW up to 3.5 t.

** Twin wheel rear-wheel drive chassis version.

Drive anywhere, in all weather

Do you drive all the time on different types of terrain and sometimes on bad roads? To meet occasional demands for enhanced traction and help you deal with poor driving conditions, Renault has developed new technology: Grip Xtend is the technology for you. Renault has developed this to improve the adaptability of your utility vehicle on difficult roads, such as unpaved or muddy tracks. The onboard computer recovers data from the wheels to optimise the vehicle's performance. When grip is lost, it adapts engine power to each wheel to improve the grip and manoeuvrability of the vehicle.

Master 4x4 (developed with Oberaigner) is there to help you. Thanks to the four-wheel drive system, its raised ground clearance and differential locking, slippery surfaces, rough roads, damp and steep slopes will no longer prevent you from working. In 2-wheel drive mode, it has an automatic rear differential lock which can be activated. It can also be activated in full 4-wheel drive mode with a front differential lock. The Master 4x4 suspension is raised by: 65 mm at the front/45 mm at the rear (twin wheels)/58 mm at the rear (single wheels). Master 4x4 also includes metal plate protection under the engine and under the body to protect vital components*.

* Optional on RWD versions

Grip Xtend

4x4 Oberaigner

Cutting emissions and your costs

Master E-Tech electric has ultra low running costs, zero emissions whilst driving and a 75 mile (WLTP^{***}) range. This gives a real-world driving range of 75 miles in summer and 50 miles in winter. All that while maintaining the same dimensions as its diesel equivalents! The Master E-Tech electric has an impressive load capacity of up to 19m³[^] and a payload that goes up to 1,425kg, plus all the extra benefits of owning an electric vehicle. Reduced road noise, no congestion charges* and low running costs from less than 7p per mile^{**} all prove that our Master E-Tech electric will not only be a great purchase for your fleet but also for your pocket!

*Emission based congestion charges in ULEZ's including London Congestion Charge as of 2020. **Less than 7p per mile calculated by full recharge of 33kWh battery based on 6 hours of 14.4p per kWh (Source: UK Power) giving £4.75 full recharge cost divided by the real world summer range in miles. ***WLTP figures shown are for comparability purposes; only compare figures with vehicles tested to the same technical procedures. The WLTP electric range shown has been achieved using the new (WLTP) test procedure. Figures obtained after the battery was fully charged. Actual real world driving results may vary depending on factors such as the starting charge of the battery, accessories fitted after registration, weather conditions, driving styles and vehicle load. Renault estimates average real world driving figures for this vehicle as 75 miles in summer and 50 miles in winter, depending on the factors above. ^ Load volume dependent on conversion

Renault E-Tech electric

Always a step ahead

Renault has been pushing the boundaries of innovation from revealing the E-Tech electric concept car in 2008, and since then has been a leader in electric vehicle manufacture in Europe. It has been a priority to fulfil our commitment and continue to develop our technology so that our vehicles stay at the forefront of the electric vehicle market. In 2018, we launched our Master E-Tech electric to bring you the same large van but CO₂ free! The ideal workhorse for emissions-free access to city centers.

First place on the track - first choice on the road

Our commitment to electric motoring innovation runs deeply in Renault's brand DNA. We were a founding partner in Formula E™, the FIA's newest race series. Winning the team championship in 2014/15 and 2015/16 seasons, along with the driver's championship in 2015/16, proves superior electric technology on the track and as one of Europe's best selling EV brands on the road.

Easy Electric Life

Electric mobility does not have to be more complicated than fuel-powered vehicles.

Far from it, electric power comes as second nature in most areas of our lives - have you ever thought about filling up your smartphone with fuel? Your van does not need to be any different from your phone, simply put it on charge.

Renault PRO+ Electric Vans

Electric isn't just the future, it's right now. That's why our customers have been driving electric vehicles since 2011, and we've since developed the largest model range of electric LCVs in the UK. For you and your business, the result is key. So you'll be pleased to hear that with a Renault PRO+ electric van, you could make significant savings compared to running a diesel or petrol van. Plus, with over 35,000 charging points in the UK, isn't it time for you to join the electric revolution?

It's in our nature

Through supplying the Eden Project in Cornwall with a fleet of 3 Zoe, 13 Kangoo E-Tech electric and 4 Twizy, we are supporting them in their mission to connect people with each other and the living world, exploring how we can work together towards a better future.

Your 100% controlled driving range

Master E-Tech electric has 75 miles⁽¹⁾ of driving range in actual use thanks to its lithium-ion E-Tech electric 33 (33 kWh) battery. The 57 kW power unit offers a torque of 225 Nm and optimum driving comfort. A range of on-board technologies, such as regenerative braking (the battery recharges when the accelerator pedal is released or when the brake pedal is pressed) or the Eco mode (less abrupt acceleration and maximum speed of 50 mph), help optimise your driving range. You can charge your Master E-Tech electric in just 6 hours with a 32 A/7 kW Wallbox. The recharging flap located on the right-hand side of the vehicle, is easily accessible.

(1) Real-world driving range greater than 50 miles including the most severe use (high load, city centre driving with frequent stops and winter conditions). Actual consumption also depends on the equipment, the driving style of the driver and the elevation profile of the route.

1. Regenerative braking. The battery recharges when you take your foot off the accelerator or when you press on the brake pedal.

2. Low consumption tyres. Their low rolling resistance contributes to conserving your driving range without degrading your road-holding or braking ability.

3. Eco mode. When you activate this, you reduce the power output of the vehicle so that you can travel further (less abrupt acceleration and maximum speed of 50 mph).

4. 7 kW charger. Recharge the battery in just 6 hours with a 32 A/7 kW Wallbox. The recharging flap located on the right-hand side of the cab, is easily accessible.

Driving range

Master E-Tech electric is now available with the E-Tech electric battery giving a WLTP* range of 95 (city cycle) miles on one charge, meaning range anxiety is a thing of the past. With real life estimates of 75 miles in summer and 50 miles in winter**.

WLTP range* combined cycle (miles)	WLTP range* city cycle (miles)	Summer (+20°C)	Winter** (-5°C)	Cost in pence p/per mile†	Cost per full recharge†
75	95	75	50	Less than 7p	Less than £5

*What is WLTP and why the real-life range is similar to it?
Worldwide Harmonized Light Vehicles Test Procedures (WLTP), this new homologation protocol gives fuel consumption and driving range results that are much closer to real life conditions figures than the NEDC protocol. While the old NEDC test determined test values based on a theoretical driving profile, the WLTP cycle was developed using real-driving data, gathered from around the world. WLTP therefore better represents everyday driving profiles.

**Why is the range reduced in winter?
Like all batteries, those in E-Tech electric vehicles are less efficient in cold weather than at warmer ambient temperatures. This means that you can expect a reduction in the range of your Master E-Tech electric in the winter. Also, in winter you are more likely to use the heating, which means Master E-Tech electric consumes more energy.

Charging solutions – options that suit your needs!

We offer you several charging solutions to make sure your vehicle is always ready to go!

Type of charger	Where to use it	Power required	Charging times (0-100%)	
Home (3-pin plug cable)*	Home / Office	2.3kW/10A	17 hours	Occasional slow charging. *Requires additional purchase of a EVSE cable.
	Home / Office	3.3kW/14A	12 hours	
Wallbox / Public charging point	Home / Office / On the go	3.7kW/14A	11 hours	Leaving the Master to charge overnight on a 3.7kW charger ensures that it will be ready for when you to begin your next day.
	Home / Office / On the go	7kW	6 hours	
Public charging point	On the go	22kW	6 hours	A standard charging time of 6 hours means your vehicle is ready to go when you are.
	On the go	43kW	6 hours	

†Less than £5 full recharge cost based on 6 hours of 14.4p per kWh (Source: UK Power) Full recharge of the 33 kWh battery.
(1) For illustration purposes only, may not reflect real-life journeys.

*Battery guarantee of 5 years / 62,000 miles, whichever comes first, this includes the battery performance guarantee to at least 70% of its original capacity.

Standard features

16" steel wheels

Kaleido

BUSINESS

Technology

- Radio with DAB, Bluetooth and USB
- 6-speed gearbox
- ESC (Electronic Stability Control) with Grip Xtend, Hill Start Assist and Trailer Swing Assist
- Trip computer - multi-functional

Interior

- Closed glove box
- 2 cup holders on centre console
- Driver's seat - height adjustable, lumbar adjustment and armrest
- Steering wheel - height adjustment
- Electric front windows
- Passenger bench seat
- Overhead parcel shelf
- Kaleido - dark grey upholstery

Exterior

- Left side loading door - unglazed
- 80-litre fuel tank
- 22-litre AdBlue tank
- C-Shaped DRL's (Daytime running lights)
- Door mirrors - electric adjustment, heated
- 16" steel wheels with small wheel stylers
- Rear doors - unglazed, 180°
- Spare wheel

Safety and security

- Side wind assist
- Full-steel bulkhead
- ABS with EBD (Electronic Brake force Distribution)
- Alarm (Thatcham approved category 1, volumetric and perimeter) (excluding Master E-Tech electric)
- Electronic immobiliser
- Remote central locking (foldable 2 button key)
- Airbag - driver

- Seatbelts - 3 point height-adjustable seatbelts with pretensioners
- Seatbelt warning - driver and passenger
- 4 disc brakes
- Automatic headlights and wipers
- Deadlocking
- Rear running board and handles
- Anchorage points : L1 - 6, L2 - 8, L3 - 10, L4 - 12
- Weight allowed per anchorage point: approximately 500kg'

Specific E-Tech electric Equipment

- E-Tech electric charging socket (right-hand side)
- Z.E. Voice: emits a distinctive range of sounds signalling that the vehicle is moving
- Engine speed limiter 62 mph
- Standard charging cable 32A (IEC 62196 - Type 2 Mennekes) 6m
- Tyre repair kit (replaces spare wheel)

Crew Van adds

- 2nd row of 4 passenger seats
- Battery interface
- Integrated storage nets and cup holders
- Single passenger seat on LWB versions
- Left and right side loading doors - glazed
- Bulkhead - full-steel with glazing

RWD additional equipment

- Rear step
- Side marker lights (LWB or MWB with extended overhang only)
- Lane departure warning system (4.5T versions only)
- Engine speed limiter 56mph (to meet legal requirement) - 4.5T version only
- Digital tachograph (4.5T version only) and CAN interface unit

Standard features

16" steel with large wheel stylers

Kaleido

BUSINESS+ (in addition to BUSINESS)

Interior

- Manual air conditioning and pollen filter
- Electric front windows - driver's side one touch descending
- Driver's seat - fully adjustable suspension type (panel vans only, not crew vans)
- Interior chrome trim
- Pivoting seatback table with dual split underseat storage compartment
- 12V power socket in load area

Exterior

- 16" steel wheels with large wheel stylers
- Chrome trim on front grille

Safety and Security

- Wide view mirror
- Key - 3 button key
- Rear parking sensors

Standard features - Conversions

BUSINESS

Platform cab

Chassis cab

Chassis Cab and Platform Cab

Dropside

Tipper

Box Van

Luton Low Loader

Chassis Cab and Platform Cab

Dropside adds

- Hot-galvanised steel front side panel and platform
- Anti-slip wooden floor
- Anchorage points in loading area (6 to 8 depending on version)
Weight allowed per anchorage point: approximately 500kg
- Folding and removable aluminium side and rear panels (400mm high)
- Foldaway step on rear side panel
- Steel cab protecting grid with ladder/long object rack
- Rear corner pillars
- Version available with a tail lift as standard (Del 500kg mesh platform tail lift with 915mm platform and fixed leading edge)
- Additional options available on request via VFS

Tipper adds

- Rear tipping "Scattolini" body (45°)
- Hot-galvanised steel loading deck (2 mm thick)
- Aluminium side and rear panels (400 mm high)
- Aluminium cab protecting grid with ladder/long object rack

Luton Box Van adds

- 11mm thick GRP side panels, with fibreglass roof skin on a 65 mm alloy frame
- 15 mm thick wisdeck birch floor
- Luton front providing over-the-cab storage fitted as standard
- Rear doors - roller shutter on alloy frame with rear columns designed to support column mounted tail lift
- Version available with a tail lift as standard (Del 500kg column tail lift with 815mm alloy platform and fixed leading edge one-two button external control)
- Additional options available on request via Truckcraft Bodies

Luton Low Loader adds

- 11mm thick GRP side panels, with fibreglass roof skin on a 65 mm alloy frame
- 15 mm thick wisdeck birch floor
- Luton front providing over-the-cab storage fitted as standard
- Rear doors - roller shutter on alloy frame with rear columns designed to support column mounted tail lift

(1) The kerb weight is the weight of the vehicle without the driver and with the fuel tank filled to 90%. This weight may vary according to the equipment and engine (by up to 330 kg). (2) The payload is calculated as the difference between the Gross Vehicle Weight (GVW) and the kerb weight.

Engines

High-performance and more efficient engines

As part of the application of the Euro 6D-Full emission standard, Master has modernised its range of engines. Benefits: a 100% Twin Turbo range, more power (up to +10 hp), more torque (up to +40 Nm) for new driving pleasure and better acceleration. All of this significantly reduces fuel consumption and CO₂ emissions. Example: the dCi 135 hp Twin Turbo gains 5 hp, +40 Nm whilst reducing its consumption by up to 15% in combined cycle (NEDC-BT)⁽¹⁾ enabling a net improvement in the total cost of ownership.

How do I choose?

- On rear-wheel drive models the Euro VI Emission standard engine range meets your expectations with the ENERGY dCi 145.
- On Front Wheel Drive models (non converted versions), the ENERGY dCi 150 and 180 versions can be combined with a 6-speed automatic gearbox.
- Let's also remind you of the electric engine of Master E-Tech electric, ideal for urban last mile delivery the last mile.

"Twin Turbo" technology

It enables a diesel engine to combine torque at low speeds and high power with immediate benefit to driving pleasure. It incorporates two standard-mounted turbochargers:

- the first turbo provides high torque from low speeds to give you greater responsiveness when pulling away and restarting;
- the second turbo takes over at higher speeds, letting you use more power without running out of steam for smooth, steady, linear acceleration.

Euro 6/VI and AdBlue®

The new range has the SCR (catalytic reduction system) enabling all of our engines to significantly reduce NO_x emissions by injecting a liquid called AdBlue®. AdBlue® is a liquid, non-toxic, non-flammable and water-based solution, which is injected at the start of the exhaust system not line. This significantly reduces pollutant emissions while preserving the performance of our engines. The AdBlue® tank is located under the body at the front and is filled via a flap which is located on the right side of the vehicle (can be filled from a bottle, or HGV AdBlue® pump in service stations).

*All prices shown are the manufacturer's recommended retail prices. The "On The Road" Price includes delivery to the dealer premises, number plates and a four-litre starter pack of AdBlue including funnel, 12 months government road fund licence at £275 (or £165 for vans with a GVW of more than 3.5 tonnes) and the First Registration Fee of £55. Other goods or services supplied by agreement between the customer and the dealer are not included. [†]Payload equals the Maximum Operating Mass (Gross Vehicle Mass or GVW) less the Kerb Mass. Kerb Mass is the weight of the complete vehicle including coolant, oil, a 90% full fuel tank, a 100% full AdBlue tank, spare wheel and jack, but excluding driver and crew. All Kerb Masses, and therefore Payloads quoted are subject to a 5% manufacturing tolerance and are based on the base level model. Any additional equipment added (options or accessories), or the selection of a higher trim level, could result in a higher Kerb Mass and a reduced Payload, and may increase CO₂ and decrease MPG figures. [†] WLTP figures shown are for comparability purposes; only compare figures with vehicles tested to the same technical procedures. Actual real world driving results may vary depending on factors such as weather conditions, driving styles, vehicle load or any accessories fitted after registration. WLTP is a new test used for fuel consumption and CO₂ figures. Please visit [renault.co.uk/configure](https://www.renault.co.uk/configure) for WLTP figures for any selected options. ** PiVG - Plug-in Van Grant. *** All prices shown are the manufacturer's recommended retail prices. i - Indicates with full battery purchase. **** For full terms and conditions visit www.renault.co.uk/warranty. The "On The Road" price includes delivery to the dealer premises, 35% PiVG (up to a maximum of £6,000 for large vans weighting between 2.5-3.5 tonnes), number plates, 12 months government road £0 for Master E-Tech electric and First Registration Fee at £55. Other goods or services supplied by agreement between the customer and the Dealer are not included.

£630

Service Plan Terms & Conditions The Service Plan offer is available on all LCV's. Valid at participating Renault dealers only and may be purchased up to 12 months after registration or before the first service (whichever is sooner). Vehicles must be ordered between 01 October 2021 and 31 December 2021 and registered by 31 March 2022.

The Renault Service plan covers the manufacturer's minimum maintenance programme requirements for the term of the Service Plan purchased (refer to the Warranty and Service sheet in the Handover Document wallet for details). The plan ends when you reach the age or mileage limit (whichever comes first). Services must be carried out in line with the manufacturer's minimum maintenance programme requirements and servicing intervals within +/- 1 month or 1,000 miles of the service interval and can only be carried out at a Renault Approved outlet. Service plans do not cover wear and tear items such as (but not limited to) tyres, wiper blades or brakes. For Service plan full Terms & Conditions visit www.renault.co.uk/owners. Cannot be part exchanged, refunded or transferred. All prices quoted are MRRP.

Extended Warranty Terms & Conditions The Extended Warranties are available on all LCV's (excluding ZOE Van). Valid at participating Renault dealers only and are available to purchase from first date of registration and may be purchased up to 12 months after registration. For full Extended Warranty Terms and Conditions visit www.renault.co.uk/extensions-of-warranties

*All prices shown are the manufacturer's recommended retail prices. The "On The Road" Price Includes delivery to the dealer premises, number plates and a four-litre AdBlue® starter kit, 12 months government road fund licence at £275 (or £165 for vans with a GVW of more than 3.5 tonnes) and First Registration Fee at £55. Other goods or services supplied by agreement between the customer and the Dealer are not included. No CO₂ or MPG data published for base Platform Cab as the final kerb weight of the vehicle is not defined until the body is fitted. ** PiVG - Plug In Van Grant *** All prices shown are the manufacturer's recommended retail prices. i - Indicates with full battery purchase. ****On the road Price is less expensive than the total retail price due to the PiVG Government Grant. To benefit from PiVG for incomplete vehicles, the 3rd party converter must register for PiVG. ^Payload equals the Maximum Operating Mass (Gross Vehicle Mass or GVW) less the Kerb Mass. Kerb Mass is the weight of the complete vehicle including coolant, oil, a 90% full fuel tank, a 100% full AdBlue® tank, spare wheel and jack, but excluding driver and crew. All Kerb Masses, and therefore Payloads quoted are subject to a 5% manufacturing tolerance and are based on the base level model. Any additional equipment added (options or accessories), or the selection of a higher trim level, could result in a higher Kerb Mass and a reduced Payload, and may increase CO₂ and decrease MPG figures. † WLTP figures shown are for comparability purposes; only compare figures with vehicles tested to the same technical procedures. Actual real world driving results may vary depending on factors such as weather conditions, driving styles, vehicle load or any accessories fitted after registration. WLTP is a new test used for fuel consumption and CO₂ figures. Please visit reault.co.uk/configure for WLTP figures for any selected options.

LCV SERVICE PLAN	MRRP (inc VAT)
5 Years / 66,000 miles	£700
5 Years / 66,000 miles - Master E-Tech electric	£750
LCV EXTENDED WARRANTY	MRRP (inc VAT)
5 Years / 100,000 miles	£785
5 Years / 96,000 miles - Master E-Tech electric	£630

Service Plan Terms & Conditions The Service Plan offer is available on all LCV's. Valid at participating Renault dealers only and may be purchased up to 12 months after registration or before the first service (whichever is sooner). Vehicles must be ordered between 01 October 2021 and 31 December 2021 and registered by 31 March 2022.

The Renault Service plan covers the manufacturer's minimum maintenance programme requirements for the term of the Service Plan purchased (refer to the Warranty and Service sheet in the Handover Document wallet for details). The plan ends when you reach the age or mileage limit (whichever comes first). Services must be carried out in line with the manufacturer's minimum maintenance programme requirements and servicing intervals within +/-1 month or 1,000 miles of the service interval and can only be carried out at a Renault Approved outlet. Service plans do not cover wear and tear items such as (but not limited to) tyres, wiper blades or brakes. For Service plan full Terms & Conditions visit www.renault.co.uk/owners. Cannot be part exchanged, refunded or transferred. All prices quoted are MRRP.

Extended Warranty Terms & Conditions The Extended Warranties are available on all LCV's (excluding ZOE Van). Valid at participating Renault dealers only and are available to purchase from first date of registration and may be purchased up to 12 months after registration. For full Extended Warranty Terms and Conditions visit www.renault.co.uk/extensions-of-warranties

(1) On the Box Van and Luton Low Loader versions, only the base chassis is painted. The box will remain white. If your box is required to be painted, please contact your local dealer to get a quote. (2) For list of compatible Bluetooth devices visit <https://www.renault.co.uk/services/multimedia/bluetooth-compatibility.html>. (3) On FWD 135, 150 and 180 versions must be ordered with air conditioning. Not available on Quickshift engines. (4) Not available on twin wheel Double Cab or Steel Tipper versions. Must be ordered with a locking differential and is not available with Power take off, MediaNav, Lane departure warning, Automatic high-low beam or 4.5T versions. Due to the weight of the 4x4 system selecting this option will reduce your payload. (5) Standard on 4.5T versions and the digital tachograph needs to be calibrated by the dealership on hand-over. (6) Not available on 4.5T versions. (7) Not available on Factory Steel Tipper. (8) Increase idle speed and Power take off - gearbox cannot be ordered together. (9) Not available on Quickshift versions. (10) Only available on Twin RWD Versions. (11) Not compatible with ECO Mode and Increased idle speed. (12) Not available on twin RWD versions. (13) Cannot be ordered with front passenger airbag or front lateral curtain airbag. (14) Standard on Double Cab Factory Tipper and LWB Twin Rear Wheel Dropsides. Still optional on Aluminium Tippers. (15) Cannot be ordered with Front lateral curtain airbag. (16) Not available on RWD. (17) Not available on FWD. (18) Requires to be taken with Long wiring loom and Battery interface. (19) Requires to be taken with B-Pillar wiring connect point. (20) Requires Battery Interface and CAN Interface Unit. (21) Not compatible with Air suspension. (22) Requires Battery interface. (23) Not compatible with Start & Stop ENERGY engines. (24) Not compatible with All-weather tyres. (25) Cannot be ordered with Front parking sensors. (26) Not available on 3.1T E-Tech electric versions. (27) Must be taken with MediaNav multimedia system.

Accessories

1. Roof bars: Very practical for transporting professional equipment and all other bulky loads. These roof bars meet all safety and quality standards and are available in either a set of 2 bar (maximum load: 89.5kg) or 4 bars (maximum load: 181.5kg).

2. Rubber floor mats: These waterproof and easy-to-maintain mats ensure total protection for the floor of your Master. They are quick to attach using 2 safety clips and come in packs of 2 or 4.

3. Loading pack*: Essential for easy access to the roof. Pack includes the steel ladder, mounted inside the door for a better hold, and the aluminium roof rack, supplied with rear roller for easy loading.

4. Kenwood Dashcam: The Kenwood DVR-A501W dashcam is a great addition for added security and reassurance on the road. The on-board camera automatically starts recording as soon as the vehicle ignition is switched on. The dashcam is designed to give drivers peace of mind, as video footage is widely accepted and used for insurance claims. The pack includes a GPS integrated dashboard camera, touch panel control and parking mode recording.

5. Sortimo racking: Ready4Work and SR5 ranges. Pre-selected and bespoke racking solutions available giving you more room & more space for what matters.

*All accessories are available to order individually.

Accessories are fitted post-production and may have an impact on real world fuel (actual) consumption and CO₂ figures.

For more information and additional accessories, consult the Master accessories brochure.

Renault PRO+, the specialist brand

You're the expert in your field and at Renault PRO+ we're here to guide you through ours. We're passionate about delivering products and services to move your business forward. So when you choose to partner with Renault PRO+ you can expect:

Specialist network

Renault PRO+ Centres have a dedicated commercial vehicle specialist. So whatever you're seeking advice on, there's always someone to help.

Business Commitment

Come rain or shine, we have a set of commitments in place to help maximise uptime and minimise downtime.

The future today - 100% electric

Renault PRO+ has been building, selling and maintaining electric vans since 2011. So when you're looking to make the switch, you know who to speak to.

A tailored approach

Your vehicles are as unique as your business. That's why we have a programme of conversions to deliver exactly the product you want. From 'off the shelf' conversions to a more bespoke approach. We'll guide you through.

Renault services

3 Years Warranty

Your vehicle is covered by a warranty package for up to 3 years from date of first registration (unlimited mileage during the first 24 months, followed by a further 1 year limited to a total mileage of 100,000). Your Renault Dealer is able to repair or replace without charge, parts that are found to have a material or assembly defect that is recognised by Renault. The paintwork warranty runs for 3 years and the anti-corrosion warranty for 6 years.

For Warranty Terms and Conditions please visit www.renault.co.uk/warranty.

3 Years Renault Assistance

Should you need it, we'll provide emergency roadside repairs or tow you to the nearest Renault Dealer. This service is available 24 hours a day and is provided for 36 months from the date of first registration (unlimited mileage for first 24 months, then limited to a total of 100,000 miles or 3 years, whichever comes first). Assistance is provided within the UK & Northern Ireland only at roadside, home and includes national recovery and onward travel. Assistance applies to mechanical or electrical defects which are covered by warranty.

For Renault Assistance Terms and Conditions please visit www.renault.co.uk/assistance.

LCV Service Plans & Extended Warranties

Renault's LCV Service Plans are the ultimate package to provide care free servicing for your new Renault LCV.

It really is the hassle free way to take care of your Renault and benefits from;

- Inflation Proof Servicing - You know exactly what you'll pay and there are no hidden costs
- Peace of Mind - No matter where life takes you, we'll be there in over 5000 workshops across Europe
- Renault Expertise & Quality - Our highly trained technicians know your Renault inside out

The Renault LCV Service Plan contains Renault services in-line with the manufacturer's service schedule, plus comes with a complimentary vehicle safety check to ensure your Renault is in the best condition possible.

Renault LCV Extended Warranty enhancements also available. Refer to the Price Guide for more details.

Service Intervals

Master E-Tech electric Service: Year 1 / 12,000 miles, Year 2 / 24,000 miles and then every 2 years / 24,000 miles thereafter

Master all other engines and versions: 24,000 miles / 2 years

Renault Network Services

No-one is better placed than Renault to maintain, fit and repair your Renault, fast. The Renault Minute (maintenance and repair with no appointment necessary) and Renault Rapide Bodycare (bumper scuffs, dings and dents, windscreen, stone chips and interior repairs...) services deliver the highest level of repair and maintenance and offer a full year's guarantee on original Renault parts. Don't forget to have a look at our wide range of additional equipment and accessories!

Renault iCare

Is an innovative Service, Maintenance & Repair product that supplies Business customers with a fully supported, managed hassle free service and maintenance package.

Renault iCare is a "Pay-As-You-Go" product that insures your vehicle is maintained by Renault technical experts when work is required.

iCare provides the following benefits:

- Full Service, Maintenance & Repair cover in the Renault Dealer Network
 - Tyres can be included within the contract at an additional fixed cost
 - Ancillary equipment can also be included (at an additional fixed monthly cost)
 - Excludes: Damage/Neglect/Abuse/Glass & Bulbs
- A fixed, pre agreed pence per mile rate
- No excess mileage charges at the end of the contract
- No pooled mileage administration
- Minimalise downtime

For more information and to obtain a quote based on your requirements, please speak to your local Renault Business dealer or visit www.renault.co.uk/icare

Customer Relations

Renault knows the value of communicating with its customers and we have established effective ways to keep in touch with you. If, after speaking to your local Renault dealership, you are not completely satisfied, please contact the Renault UK Customer Relations Team on 0344 3350000* (Mon-Fri 8.00am to 6.00pm, Closed on Bank Holidays. Live Chat Mon-Fri 8.00am to 9.00pm). You can also visit our website www.renault.co.uk or write to us at: Renault UK Ltd, The Rivers Office Park, Denham Way, Maple Cross, Rickmansworth, Hertfordshire, WD3 9YS.

Finance options*

There are numerous ways that you can finance your new vehicle with Renault. Whether you are a fleet or a private buyer, Renault Finance allows you to tailor your payment plan to your needs and circumstances.

Continue the Renault **Master** experience
at www.renault.co.uk

Although every effort has been made to ensure that the information contained within this brochure is as accurate and up to date as possible, Renault U.K. reserves the right to modify its models without notice, including their characteristics, specifications, equipment and accessories. Brochures inevitably become out of date or inaccurate in some respects, in that such characteristics, specifications equipment, or accessories may be changed after the publication date given below and can differ from the descriptions given or the photos displayed. It is therefore necessary to check with your Renault Dealer before purchasing any product that the characteristics, specifications, equipment or accessories of the vehicle on order are as advertised.
